

## SkyMaster 8x56 Deluxe

Item no:72022

Celestron's SkyMaster Series of large aperture binoculars are a phenomenal value for high performance binoculars. Ideal for astronomical viewing or for terrestrial (land) use, especially over long distances. SkyMaster models feature high quality BAK-4 prisms and multi-coated optics for enhanced contrast. Celestron has designed and engineered the larger SkyMaster models to meet the special demands of extended astronomical or terrestrial viewing sessions.

### General Details:

- 8x magnification porro prism binocular
- Fully Multi-Coated optics for extremely sharp, clear views
- Rugged full-size design for maximum image brightness
- Nitrogen purged for waterproof and fog proof performance
- Multi position twist-up eyecups for quick adjustment and optimum eye relief
- Suitable for terrestrial or astronomical viewing
- Protective rubber covering for ultra-firm grip
- Large center focus knob for easy focusing
- Carrying case included for travel and safe storage
