

Ultima 65 - 45 Degree

Item no:52248

This model, the Ultima 65-45 is the most compact model in our Ultima series spotting scopes, the 65 mm refractor features a 45 degree viewing angle and excellent multi-coated optics packed into a portable and durable refractor design and it comes standard with an 18-55x zoom eyepiece.

This series was designed to perform well in a range of viewing situations, making it a great all-around optical instrument. You'll love it for observing nature and long distance spotting and since it is completely waterproof you can feel comfortable using it in extreme weather. The green rubber optical tube allows for subtle observation in any nature environment. Ultima spotters are a great companion for any nature or outdoor enthusiast.

Ultima Series spotters perform extremely well under all light conditions which makes them ideal for all types of outdoor viewing activities including bird watching, nature and wildlife, target shooting ? even astronomy.

The Ultimas are as great to look at as they are to look through. Their sleek design is accented with graceful contours that make them easy to hold and handle.

The Ultima Series spotters are the perfect choice for the outdoor enthusiast looking for a spotter with quality design and construction, superior optics, and versatility at an affordable price.

As with all non ED Celestron Ultima refracting spotting scopes (65mm, 80mm, and 100mm), the design of the main objective lens permits the image at all powers to be surprisingly low in chromatic aberration (colour fringing). This one feature alone is remarkable for an achromatic spotting scope at this price, and places the achromatic Ultimas as a benchmark product in this respect.

We feel that at such budget prices, the waterproof 65mm, 80mm and 100mm achromatic spotting scopes easily represent the premier position in their respective class, and out-perform many of the much more expensive spotting scopes. Indeed, the 80mm achromatic Ultima has already been successful in winning a group test in the BBC Sky at Night magazine.

GENERAL FEATURES:

- 65 mm Refractor Spotting Scope
- Multi-Coated optics
- 45° viewing angle
- 18-55x zoom eyepiece
- Sight tube for quick targeting
- Waterproof and Fogproof
- Soft carrying case

TECHNICAL SPECIFICATIONS:

OPTICAL DESIGN: Refractor

APERTURE: 65 mm (2.56 in)

FOCAL LENGTH: 386 mm (15.2 in)

FOCAL RATIO: 5.94

FINDERSCOPE: Sighting tube

ANGLE: 45 °

EYEPIECE 1: 7-21 Zoom

MAGNIFICATION 1: 18-55x

CARRYING CASE: Soft Case

ANGULAR FIELD OF VIEW: 1.7° - .73°

LINEAR FIELD OF VIEW (@1000 YDS): 89ft @ 18x 38ft @ 55x

EYE RELIEF: 18mm @ 18x

NEAR FOCUS: 20ft @ 18x

OPTICAL COATINGS: Multi-Coated

TRIPOD ADAPTABLE: Yes

CAMERA ADAPTABLE: Yes

OPTICAL TUBE LENGTH: 13 in (330.2 mm)

WEIGHT: 37 oz (1048.93 g)

WATERPROOF: Yes

NITROGEN FILLED (FOGPROOF): Yes
