

TrailSeeker 80 Straight Spotting Scope

Item no:52333

Read a review of the TrailSeeker 80 Angled Spotter by BirdWatching Magazine below.

The TrailSeeker spotting scope series offers an amazing viewing experience in a rugged and durable rubber armored housing that is fully waterproof and Nitrogen filled. The optical system with proprietary XLT multi-coatings renders high resolution images with outstanding contrast while the dual focus mechanism allows you to get subjects in focus quickly and then fine tune the image.

Enhance the View

Large objective 80mm and 100mm models are extremely useful in the field both for all the additional light they allow into the optical system and in making the most of the dawn's early or the twilight's fading light.

Feature This

The TrailSeeker offers numerous features normally found only in much higher priced spotting scope models, including a sliding sunshade, rotating tripod mount, and interchangeable eyepiece. The TrailSeeker is the perfect companion for anyone who enjoys the outdoors.

Outdoor Adventures

Whether bird watching, hiking, camping, or just observing the scenery, the TrailSeeker Spotting Scope series is outdoor ready! These scopes' robust, fully armored design protects them when out in the field and provides additional peace of mind that they'll be ready when you need them.

FEATURES:

- Celestron's proprietary XLT fully multi-coated optics increase light transmission through the optical path to deliver crisp, high contrast images.

- Focus on a subject quickly, then fine tune the image using the dual focus mechanism with course and fine adjustments.
- Get close to the action with a zoom up to 60x magnification or see the widest field of view at 20x.
- Perfect for those who want performance in an easy-to-carry package, the 80mm objective design lets in plenty of light while keeping the overall size of the scope to a minimum.

SPECIFICATIONS:
