Regal™ M2 Spotting Scope Series

Celestron's Regal M2 spotting scopes are the next generation of our top-performing Regal F-ED spotting scopes. Regal M2 provides all the advanced features usually found on more expensive scopes, including Extra Low Dispersion (ED) glass. With Celestron's proprietary XLT coatings, you'll get the maximum light transmission and sharpest images. The scope also includes an upgraded dual focus mechanism, bringing your subject into focus two times faster.

Regal M2 is fully waterproof and nitrogen-purged. The magnesium alloy body decreases the weight of the scope by 14% compared to the previous model. It's available in a new green color and comes with a carrying case. If you're interested in photographing your discoveries, just attach your SLR camera to the scope using a T-Ring and T-Adapter to produce stunning images! The Regal M2 spotter is a great companion for any outdoor enthusiast.

- 1 Interchangeable Eyepiece Mount
- 2 Zoom Eyepiece
- 3 Dual Focus Knob

- 4 Magnesium Alloy Body
- 5 ED Objective Lens
