

TrailSeeker to iPhone 5/5S Smartphone Adaptor

Item no:81051

It's never been easier to capture high-quality images through your TrailSeeker spotting scope! The Celestron Smartphone Adapter is custom-fit to your iPhone 5/5S and TrailSeeker's zoom eyepiece. That means you'll get an ultra-secure connection without play for sharp images and steady videos. Unlike "universal" adapters, Celestron's Smartphone Adapter has no moving parts and requires no manual adjustment. Simply slide the adapter over the eyepiece. Since the Celestron Smartphone Adapter is designed to fit the exact diameter of the TrailSeeker eyepiece, your camera is perfectly centered every time.

Once you've captured the perfect shot, share it with friends—you can use nearly all the functions of your phone without removing it from the case. You can even use your camera for traditional photography while it's still in the adapter; just remove the adapter ring and you're ready to take wide view shots with your phone.

LIGHTWEIGHT, COMPACT DESIGN

With the Celestron Smartphone Adapter, you'll never have to choose between carrying a camera or a spotting scope again. Just slightly larger than your smartphone itself, this adapter won't add weight or bulk to your gear. From birding walks to backpacking trips, this adapter goes anywhere you bring your phone. Take the Celestron Smartphone Adapter on your next adventure and come back with vivid photos and video of your discoveries!

QUICK AND SIMPLE TO USE

1. Place your phone in the case and attach the adapter ring.
2. Slide the adapter over the eyepiece.
3. Launch your camera app and begin capturing photos and video!
